

Water Board Meeting Minutes
August 9, 2021 – 6PM

Attending: Dick Waters, Jim Smith, Don Nelson, Bill Meunier, Jeri Reichman

- Discussed water rate increases. Increases have provided approximately \$1,000 toward department. We have only had one billing since increase however.
- Snyder electric is replacing pole near water building at town barns. Some lines are already disconnected and pole is falling apart.
- Root Well Company is installing a new pump in an existing well near the well house. This will be our secondary source of water as mandated by the county. Root will tie in the new well piping with our existing line to be used in case of an emergency water situation.
- All hydrants have been flushed and will be flushed again in the fall
- Discussed back-flow preventers. Best to call Rural Water as a resource for advice.
- Discussed rough trail ditches above water tower. For now, will purchase two “Rough Trail” signs to be installed at top and bottom and purchase reflectors for each of the 4 ditches on the road.
- Will contact Hal Forestry for bid information on water property tree lot

Meeting adjourned at 6:45
